Jabalpur, India — Open to Remote (International Time Zones)

PROFESSIONAL SUMMARY

Full Stack Developer specializing in React, Next.js, and Node.js, with experience shipping production-grade applications — including a social platform with 25+ REST APIs and real-time features, deployed on AWS EC2 with Docker and CI/CD. Self-taught full stack development and DSA independently from 2022–2025 before gaining formal industry experience. Skilled in authentication, RBAC, Redis caching, and scalable backend architecture. Experienced in remote, async collaboration using Agile methodology and Git-based workflows; available to work across international time zones.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Redux Toolkit, RTK Query, Tailwind CSS, shadcn/ui

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Cookie Authentication, Socket.IO

Database & Cache: MongoDB, Mongoose, Redis

Cloud & DevOps: Docker, Docker Compose, AWS EC2, Nginx, PM2, GitHub Actions (CI/CD), Cloudinary, Render, Vercel

Testing: Jest, Supertest, Postman, Swagger/OpenAPI, Unit Testing

Tools: Git, GitHub, Linux, VS Code

Core CS: Data Structures, Algorithms, MVC Architecture, Authentication, Authorization (RBAC), API Design, Responsive Design, Performance Optimization, Scalable Backend Architecture

Spoken Languages: English (Professional Proficiency), Hindi (Native)

PROJECTS

SocialSphere | Full Stack Social Media Platform

Next.js, MERN, TypeScript, Redis, Socket.IO, Docker, AWS EC2, Nginx, PM2 | GitHub | Live 2026

- Built a production-ready social media platform with 25+ REST APIs and 15+ core features including authentication, posts, comments, notifications and real-time messaging, using Next.js, MERN, TypeScript and scalable MVC architecture.
- Implemented secure JWT Authentication with access/refresh tokens, RBAC and HTTP-only cookies across 20+ protected API endpoints, Redis caching, Socket.IO real-time updates, posts, comments, likes, follow system and personalized feeds.
- Dockerized frontend and backend services with Docker Composer, deployed on AWS EC2 using PM2 and Nginx, configured GitHub Actions CI/CD, Cloudinary, Swagger, Jest and Supertest.

DeepSeek AI Clone | Next.js, React, Clerk, MongoDB Atlas, DeepSeek API | GitHub | Live 2025

- Built an AI-powered chat application using Next.js, Clerk Authentication, MongoDB Atlas and secure server-side API routes.
- Integrated the DeepSeek API with markdown rendering, syntax highlighting and persistent chat history while designing a responsive interface for desktop and mobile.
